DETAILED ACTION

Allowable Subject Matter

1. Claims 1-46 are allowed. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or obviously suggest the claimed invention.
2. Specifically, no teaching or obvious suggestion was found of the limitation "a switching device that terminates the RF electrical field, the termination of the RF electrical field ejecting the plurality of ions from the ion trap for detection" as recited in claims 1,26,37,39, and 46.
3. Moreover, Kelley teaches termination of the RF voltage (see col.5, lines 1-4), but fails to teach or reasonably suggest that ejected ions will be detected as a result of the termination as applicant points out in his response received on 12/12/03. In addition, US Pat No. 6,545,268 issued to Verentchikov et al teach the rapid termination of the RF field (see col.7, lines 32-39), but fails to teach or obviously suggest that ejected ions will be detected as a result.
4. Lastly, claims 2-25,27-35,37-38, and 40-45 are allowed by virtue of their dependence on claims 1,26,37, and 39, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
